

Project Architect / Studio Leader

We are currently seeking a Project Architect to join our team. As a Project Architect, you will be accountable for assigned project performance efficiency and team communication, responsible for technical content and issuance of deliverables, coordination of internal and external disciplines, and for the mentorship and supervision of internal production staff. This position requires the applicant has an understanding of complex aspects of architecture and the passion to provide quality service, collaboration, communication, and documentation in all aspects required of the growing organization.

Responsibilities Include:

- Manages and organizes project teams and team assignments to execute projects from conceptual phase through construction completion
- Prepares complex detailed project drawings using diverse experience and knowledge of architecture principles, practices and advanced techniques
- Reviews project drawings and assists in establishing and maintaining milestones/deadlines
- Performs design computations and project-specific architectural details
- Validates that code, zoning, and other AHJ requirements of project(s) are met
- Writes reports and assists in the development of material specifications for assigned project(s)
- Participates in all phases of project communication, including client, consultant, and AHJ reviews
- Staff supervision, scheduling, and mentorship for entry-level design staff including focused reviews of documentation quality and production efficiency

Preferred Skills, Knowledge and Experience:

- **REQUIRED: Licensed Architect (FL preferred but not required) with 10+ years of experience**
- **REQUIRED: Thorough understanding of workflows and active utilization of contemporary architectural design software, including Revit & AutoCAD Architecture**
- Strong knowledge of design, trends, vernacular construction methodology, material applications, and manufacturer-supplier appropriateness
- Strong organizational and project management skills
- Ability to lead teams and work effectively with other project leaders
- Ability to effectively meet deadlines and communicate effectively both verbally and in writing
- Advanced knowledge of land development, building, and life-safety codes with the ability to research, apply, and incorporate into technical project-specific documents
- Advanced knowledge of architectural building systems
- Advanced knowledge of internal and external coordination & QA/QC processes
- Contemporary industry knowledge of sustainable design strategies & LEED guidelines
- Team player; effective communicator; "Whatever it takes" approach to tasks & objectives
- Explicit desire and evident focus to elevate their personal career through the promotion and expansion of the firm, its works, and its brand, culture and reputation.

Required Technical Proficiency:

- **REQUIRED: Autodesk Revit & AutoCAD Architecture** (Revit Model Mgmt experience preferred)
- Microsoft Office (Word, Excel, Outlook)
- Desirable but not required: Photoshop, InDesign, SketchUp, Enscape, Rhino, Grasshopper, Lumion
