

Architectural Associate / Graduate Architect / BIM Designer

We are seeking a motivated and professional Architectural Associate / Graduate Architect to collaborate and work cohesively as an integral player on our team. The desired individual will assist in streamlining creative design and technical production from conception through overall completion of projects, utilizing Revit for all phases of Architecture. This role includes coordination with the project team, clients, and regulatory agencies. This exciting and dynamic opportunity will challenge the ideal candidate to collaborate on compelling and effective architectural design initiatives that will contribute to the mission and standards of Straughn Trout Architects.

Responsibilities Include:

- Conceptualize and create innovative and effective designs for a variety of projects – both digital and print from idea/concept to execution
- Evolve design concepts through phases from schematic ideas into Construction Documents utilizing Revit 3D BIM modelling with high accuracy, precision & efficiency
- Develop architectural plans, sections, elevations & details in organized submissions for owner/contractor/consultant deliverables
- Create customized Revit content and coordinate into project document sets
- Documents design computations and project-specific architectural details
- Reviews project drawings and assists in establishing and maintaining milestones/deadlines
- Collaborate with internal/external members on project deadlines and workflow milestones
- Explicit desire and evident focus to elevate their personal career through the promotion and expansion of the firm, its works, its brand, culture and reputation.

Preferred Skills and Experience:

- **REQUIRED: 2+ years of professional architectural design experience**
- **REQUIRED: Organized, detail-oriented self-starter that can work within a collaborative environment**
- **REQUIRED: Expertise to effectively utilize Revit**
- Familiarity of architectural building systems with the ability to create technical drawings and 3D models in accordance to standard construction techniques and principles
- Actively participate in internal and external coordination & QA/QC processes
- Proven ability to collaborate to elevate the quality, creativity, and deliverables developed
- Team player with collaboration and communication skills who can also work autonomously
- “Can do” personality that thrives in a deadline driven and rapidly changing environment
- Demonstrate quality and thoroughness in all aspects of work performed

Required Technical Proficiency:

- **REQUIRED: Autodesk Revit, Microsoft Office (Word, Excel, Outlook & PowerPoint)**
- Desirable but not required: Photoshop, InDesign, SketchUp, and Lumion
